Tips for Success

If you're new to online courses, or if you just need a quick refresher, be sure to take a look at the Student and Parent Handbook.

Prerequisites

There are no prerequisites for this class.

Course Overview

Geometry part 1 covers three major concepts including transformations, proofs, and trigonometry. Along with learning these three pieces of knowledge, the course will also have you develop 21st Century Skills in problem solving as well as the attribute of humility.

Course Learning Outcomes

Geometry Part 1 is designed to deepen your understanding of the space around you. You will study congruence, similarity, properties of shapes, transformations, proofs, and trigonometry. The course has been divided into three major sections so by the end of the course diligent students will be able to master the following skills.

- Transformations: reflect, translate, rotate, dilate geometric objects
- Proofs: use logic and reasoning to proof geometric theorems
- Trigonometry: learn the trigonometric ratios and apply them to solve real life problems

Course Materials

All the materials you need are included in the course. You do not have to buy any additional textbooks.

Students may use a handheld graphing or scientific calculator or a Desmos online calculator (found at desmos.com/scientific or desmos.com/calculator).

Assignments

This course is divided up into 16 modules with modules 5, 10, and 14 as review and exam modules. Module 15 is a project module. Each learning module is split into 4 topics and a review and quiz.

Topic Assignments

There are 44 Topic Assignments, one for each learning topic. These Topic Assignments consist of between 5 and 15 questions that are completed via Derivita, which is embedded in Canvas. You will not need to go to any other website to complete assignments.

Practice Quizzes

At the end of each learning module there will be a practice quiz to help prepare you for the module quiz. These quizzes are not graded, and do not impact your overall course grade.

Module Quizzes

In addition to practice quizzes at the end of each module, there will also be a graded quiz. Module quizzes allow for two attempts on each question. You can use your content guide as reference. These quizzes are graded and are calculated into your overall course grade.

Projects

Projects

You will be working on your project at the end of each module. Each project is chunked into 2-3 parts, then submitted before the unit exam.

Content Guides

You will be asked to complete content guides as you work through the course. These guides will help prepare you for the assessments by creating notes of the essential material provided in the lessons. These guides can be used on your module quizzes and exams.

Content guide templates are provided in every learning modules and are to be submitted before each unit exam. Modules 1-4 content guides are submitted in Module 5. Modules 6-9 content guides are submitted in Module 10. Modules 11-13 content guides are submitted in Module 14.

Exams

You will complete 3 unit exams and a final exam for this course. The unit quizzes, like module quizzes, allow for two attempts on each question. The final exam covers material from the entire course.

Grading

Your grade in this course will be based on these assignments and exams:

Assignment and Assessment Chart

Assignment or Exam	Grading	Percent of Total Grade
44 Topic Assignments	Computer	20%
11 Module Quizzes	Computer	35%
11 Content guides (submitted by Unit)	Teacher	10%
3 Unit Projects	Teacher	15%
4 Exams	Computer	20%

Resubmissions and Retakes

For information about resubmitting assignments and retaking quizzes, please contact your AK Grad instructor.

Grade Scale

Your letter grade is calculated according to these percentages.

Grading Scale

Grading	Scale
A	100% - 93%
A-	92% - 90%
B+	89% - 87%
B	86% - 83%
B-	82% - 80%
C+	79% - 77%
C	76% - 73%
C-	72% - 70%
D+	69% - 67%
D	66% - 63%
D-	62% - 60%
F (fail)	59% - 0%

Course Policies
